DATE MAILED: 07/11/2003

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Receipt is acknowledged of the amendment, filed on 6/12/2003, which has been entered in the file. Claims 20-25 are pending.

Allowable Subject Matter

1. Claims 20-25 have been allowed over the prior art of record.
2. The following is a statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest: a self-service terminal comprising control means for moving a plurality of movable shutters relative to a media entry slot to define an entry aperture; wherein one shutter is movable vertically relative to the slot and another shutter is movable horizontally relative to the slot; wherein the shutter means comprises paired opposed shutters, in combination with the other claimed limitations as set forth in the claims.

Holter (US 3,760,162, previously cited) teaches a self-service terminal (figure 1) comprising: means (entrance 14) defining a media entry slot; shutter means (16) movable into at least partly overlapping relationship with the slot (figure 1 shows the shutter 16 at least partly overlapping the slot 14); and controller means (means, not shown, for lifting the shutter 16 upon detection of a card 10 containing appropriately located markings 15) for moving the shutter means relative to the slot to define an entry aperture (detection of appropriately located markings 15 on card 10 causes the shutter 16 to be lifted, and an aperture in the shutter 16 lines up with the entrance 14, thus defining an entry aperture); (see figures 1, 2, column 2 lines 44-57, column 2 line 65 -

column 3 line 12, and column 4 lines 29-68). However, Holter only teaches the use of a single shutter, not a plurality of shutters.

While Swinton et al (US 6,398,108 B1, previously cited) teaches a self-service terminal (10) including a plurality of shutters (20A and 20B), the plurality of shutters are provided at a dispenser slot (20), not a media entry slot (12). Thus, without the benefit of applicant's teachings, there is no motivation for one of ordinary skill in the art at the time of the invention to combine the plurality of shutters provided at a dispenser slot, as taught by Swinton et al, with the self-service terminal, as taught by Holter, having a single shutter provided at a media entry slot, in a manner so as to create the claimed invention.

Furthermore, while providing a plurality of shutters as compared to a single shutter may seem to be a duplication of elements, without the benefit of applicant's teachings, there is no motivation for one of ordinary skill in the art at the time of the invention to utilize a plurality of shutters to define a media entry aperture, since the prior art of record functions adequately for the intended operation using only a single shutter (there is no teaching of a need for a plurality of shutters, or a benefit obtained by the use of a plurality of shutters to define a media entry slot).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mohr et al (US 2003/0091145 A1) teaches an X-Ray shielding system using a plurality of shutters to provide a variable size aperture (see figures 11-14 and paragraphs 36 and 37).
